Icing CP

Description

A fine white powder, free from abnormal odours and flavours and free from visible extraneous material.

Storage

Cool, dry environment, preferably between 65 to 85 %RH and at 15-20°C avoiding temperature fluctuations in excess of 5°C in any 24h period. The product should not be subject to any draughts. Avoid direct light and sources of ignition. Do not store close to substances with strong odours.

Shelf-life

Up to 32 weeks from date of manufacture if good storage practice is observed Usable life has been assessed as the period of time under appropriate storage conditions where the product remains free flowing. Product that has exceeded its 'usable life' will be fit for use provided its flowability is acceptable as no other quality parameters will be affected. Does not require a best before date (refer to regulation 7, Food labelling regulations amendment 1996).

Declaration for Use / Origin

Sugar (free flow agent need not be declared if not functional in finished products) produced from Sugar Beet grown in the UK and Tricalcium Phosphate manufactured in Israel, Europe or USA from minerals.

Additional Ingredients

Tricalcium Phosphate (Free Flow agent), E number for TCP—E341.
